

Did You Know?

Women are less likely than men to receive CPR from a bystander!

According to the American Heart Association*,

- Only **39% of women** receive CPR from bystanders in public compared to **45% of men**
 - Men's odds of surviving a cardiac event are **23% higher than women's**
 - There are several **myths and fears** about performing CPR on a female victim
- *<http://cpr.heart.org/en/training-programs/community-programs/cpr-for-women>*

PRESTAN wants to help change this with the PRESTAN Professional Female Manikin designed to *build confidence* in CPR training!

Designed to Transform Training

- *Encourage Dialogue & Breakdown Barriers**
- *Eliminate Gender Bias in CPR Administration**
- *Improve CPR Survival Rates in Women**

When used in combination with the PRESTAN Female Accessory (to represent a bra), Manikin Shirt, and AED Trainer - the PRESTAN Female Manikin offers the most realistic training experience to help build confidence when learning critical lifesaving skills.

**American
Red Cross**
